- The MAILING DATE of this communication appears on the cover sheet with the correspondence address -

Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Status

- 1) ☒ Responsive to communication(s) filed on 09 December 2004.
- 2a) ☐ This action is FINAL. 2b) ☒ This action is non-final.

DETAILED ACTION***Election/Restrictions***

1. Applicant's election without traverse of Group I, claims 1-7, in the reply filed on 12/09/2005 is acknowledged.
2. Claims 8-12 have been withdrawn from further consideration pursuant to 37 CFR 1.142(b) as being drawn to a nonelected invention, there being no allowable generic or linking claim. Election was made without traverse in the reply filed on 12/09/2005.

Claim Rejections - 35 USC § 102

3. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

4. Claims 1-3 and 6 are rejected under 35 U.S.C. 102(b) as being anticipated by Goserud (US 5,813,529).

Goserud discloses a cap having a base (flange 11), a tooth (collar 10) extending from the base, and an aperture (21) extending through the base.

5. Claims 1-3 and 6 are rejected under 35 U.S.C. 102(b) as being anticipated by Lump (US 4,177,933).

Lump discloses a lid having a base (17), a tooth (20) extending from the base, and an air outlet aperture (25) extending through the base.

Application/Control Number: 10/807,773

6. Claims 1-4 and 7 are rejected under 35 U.S.C. 102(b) as being anticipated by Brimo'020 (US 5,221,020).

Brimo'020 discloses a can cap (12) having a base and a tooth (38) extending from the base, a pad (42) having a thickness that is less than a height of the tooth (38).

7. Claims 1-4 and 7 are rejected under 35 U.S.C. 102(b) as being anticipated by Brimo'088 (US 5,346,088).

Brimo'088 discloses a can cap (12/44) having a base and a tooth (38) extending from the base, a pad (42) having a thickness that is less than a height of the tooth (38).

Claim Rejections - 35 USC § 103

8. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

9. Claim 5 is rejected under 35 U.S.C. 103(a) as being unpatentable over Brimo's (US 5,221,020 or US 5,346,088).

The Brimo's cap meets all of applicant's claimed subject matter except for the specific teaching of the compressor pad being doughnut shaped. Although the pad (42) of Brimo's cap is soft enough to insure the entire top (16) of the can (10) is in sealing contact with the cap with the presence of the punch key (26); however, it is preferred to have the punch key (26) removed from the can prior to applying the cap. It would have been obvious to an ordinary skilled person in the art, at the time of the invention, to have modified the Brimo's cap by having provided the

pad (42) in doughnut shape such that the pad would be in better sealing contact with the top of the can around the punch key in order to prevent spillage and to eliminate the step of removing the punch key from the can.

Conclusion

10. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure has been cited on form PTO-892 along with the applied prior art.
